Entrepreneurship, Fitness, Scuba diving, Surfing, Movies, Cycling, Attending lectures, interest in science and mathematics

Work experience additional information

Companies I started

Fastpricing (<http://www.fastpricing.com/>)

Fastpricing is a start-up I have started together with 3 other partners. With Fastpricing our main goal is to develop smart solutions to optimise revenue and integrate the newest technologies into a broad range of markets. Our first product is a revenue and occupation optimisation tool for restaurants. With big data and machine learning algorithms we look at a restaurants POS system data and see where we can optimise. See a demo of our tool here: <http://hetverdrag870.nl/reserveren/>

Logo BKK (<http://www.logobkk.com>)

At the end of my internship as a marketing manager in Bangkok I saw a great market opportunity to duplicate my Dutch company Custom Logo to South East Asia. Logo BKK produces and sells design work of high quality with an affordable price.

ShaveSmart (sold) (<http://www.shavesmart.nl>)

I saw a great market opportunity in selling affordable razorblades on a subscription-based model. To capitalize on this opportunity I decided to start ShaveSmart. I have shot a commercial and constructed a webshop in which my own branded razor blades are sold to the Dutch and Slovenian Market. This webshop made a good turn over and in 2015 I sold the business to a new owner.

Custom Logo (sold) (<http://www.customlogo.nl>)

In 2009 I saw a great market opportunity in selling affordable and high quality design work to the Dutch market I have set up a workflow that brought down the price of a logo design significantly. The workflow consisted of a freelance network in India, Latin and the Philippines that assisted me. Besides selling logo designs I also helped SME's with their website development and print word. In 2015 I sold the company and I am currently still a stockholder and advisor.

AB-iSolutions (<http://www.ab-isolutions.nl>)

AB-iSolutions started of as a SEO and SEA company in 2009 but due to lack in time I transformed this website is my personal portfolio website where I show the companies I started and the companies I helped scale up.

Pandoras Intermediar

Pandoras Intermediar was the first company I founded this company was active in the human recourses business. We had founded a new creative way on how to get high skilled technical personal to companies. This company and all its data was sold in the beginning of 2008.

Work Skills

Technical delivery manager at Capital Partner Group (<http://capital-partner.nl/>)

The Capital Partner Group where I did my final research into the company take over markets is specialised in scaling up companies. My task here as technical delivery manger was to mange all technical tasks and make sure all developers know what needs to be done. I also helped with the system architecture and development of a verity of projects ranging from custom Wordpress theme development to .net projects.

Project manger at Service Royal (<http://www.serviceroyal.nl>)

I started working at Service Royal (SR) when the company was still very small and start up like company and become good friends whit the owner we have grown it to a company that operates in Holland, Belgium and Germany. I did not do a full time job there but I contributed greatly to the success.

Sales manager at Countree (intern) (<http://www.counthree.eu/>)

During my internship I did a great variety of task from the Social Media account management to marketing and sales management. During my time at Counthree I doubled the company in size by the clients I have provided.

Sales manger at Hamilton Bright (<http://www.hamiltonbright.com/>)

I needed to train sales manger on how to sell new products from Philips and Samsung and place promotion material.

Call desk agent Teleperformance (<http://www.teleperformance.com/en-us/>)

Technical support team on how to install and repair internet and TV problems.

Electronic engineer Mosa (<http://www.mosa.nl/>)

I fixed the automation process at the Mosa in Maastricht I fixt a lot of electro motors and draw a new production street for producing a new kind of tile whit a LED light embedded.

Electronic engineer Mosa (intern) (<http://www.mosa.nl/>)

Same tasks as before but then as an intern.
